Letter of Reference

I have known Dr Raghavan for the last 10 years. Met him first when he came to our Institute to give a lecture on Ayurveda. Realized that he is indeed a 'Master' and became his 'patient'. Subsequently, I also organized several camps in my Institute, where hundreds of patients benefited from his 'magic'.

Dr Raghavan is a doctor extraordinaire. He diagnoses sensing the pulse or *nadi*. He says that the 'body does not forget' and I saw him demonstrate this on innumerable occasions - he describes events in the patient's life in remote past. Often the patient himself (herself) would have forgotten about it. These events would have a connection with patient's current state of health or how the disease would progress.

Dr. Raghavan's treatment is based on traditional Ayurveda. He doesn't treat a symptom or a single already manifested disease. The treatment is complete, holistic, and addresses multiple issues – some manifest and many latent.

One aspect that is interesting with Dr. Raghavan is his curiosity. He has the mind of a scientist - is very keen to learn new developments in science and technology.

Dr. Raghavan has a full-fledged degree in allopathy and he is knowledgeable about life saving drugs and treatments that modern medicine has to offer. This unique combination of the modern knowledge and ancient wisdom makes him unique as a medical practitioner and a blessing to the society.

I have been a witness to innumerable, often mind-boggling and unbelievable cures that he has performed. I am happy to answer any queries and questions. It is indeed an honor to write this letter.
