**TO WHOM SO EVER IT MAY CONCERN**

Dr.Raghavan Ramankutty, aged 71 years, is known to me for the last 50 years. He is known to me as a student in the Government Medical College, Kottayam, as an intern while completing his Compulsory Rotatory Residential Internship (CRRI) in 1978, and as a Senior Resident for two years (1978-1980) at the Department of Medicine in the Government Medical College Hospital, Kottayam, Kerala, India.

He was hardworking and sincere with excellent bedside manners.

His association with Ayurveda has enriched his capacity to understand diseases and treatment. His integrated approach towards treatment has been helpful for the public. This was witnessed by me during his successful treatment of several patients in hepatic Coma during the Jaundice epidemic in Kerala.

I wish him all success for his future endeavor.

**Dr. Mathew Parackal M.D.**

Retired Professor of Medicine
